

The **Aerospace Delta** is **Europe's most advanced ecosystem for drone innovation**, encompassing the full spectrum of Unmanned Aerial Vehicle (UAV), Unmanned Aircraft System (UAS), and Urban Air Mobility (UAM) activities. Located in the Zuid-Holland river delta, this region accounts for approximately **50% of all drone-related operations** in the Netherlands.

More than **140 companies and organisations** are active in drone development, testing, manufacturing, and deployment, collectively employing over **750 FTEs**. The ecosystem spans fundamental and applied research, system design and engineering, certification, and commercial applications. Around **2,500 students** are trained in drone-related disciplines.

Aerospace Delta offers:

Access to a World-Class Aerospace Ecosystem: Our space cluster is integrated into a broader aerospace network that encompasses the aeronautics, aviation, and drone sectors. This ecosystem includes over 240 companies and 60 institutes & organizations, supported by a highly skilled workforce of more than 10,000 employees.

A Strategic Location: Centrally positioned for easy access to European markets, international airports, and key industry hubs. Amsterdam Airport Schiphol offers direct flights to 263 destinations across 83 countries.

Services & Support for Foreign Companies:

- **Legal and Regulatory Support:** Guidance through local, national and EU regulations, tax schemes, and permits.
- **Incorporation Services:** Assistance with business registration, financial compliance, and operational licensing.
- **Tax Incentives:** Information on available incentives and financial support for aerospace and technology firms.
- **Site Selection Assistance:** Tailored insights into commercial spaces, industrial parks, and innovation hubs suited to aerospace.
- **Access to Skilled Talent:** A pipeline of trained professionals from nearby universities, research institutions, and specialized schools.
- **Recruitment Support:** Connections with local recruitment agencies, staffing support, and workforce training programs.
- **Access to R&D Facilities:** Introductions to regional R&D centers, laboratories, and testing sites.
- **Partnership Opportunities:** Connections with local research institutions, incubators, and innovation hubs.
- **Attractive Funding for R&D:** Information on R&D tax schemes and venture capital opportunities for innovation projects.
- **Industry Networking Events:** Invitations to key regional events, industry fairs, and business forums.
- **Partnership Facilitation:** Support in connecting with potential local and international partners.
- **Personalized Support Team:** A dedicated account manager, multilingual support to answer queries, provide introductions, and assist with all aspects of business relocation.
